## Coverage of the Workshop:

- Introducing the concept of Open Source
- Features of Open Source Tools
- Hands-on-session to develop a small working ILS

# A Two Day Workshop On Open Source Software Tools for Library Professionals: Integrated Library System –Koha and Content Management System -- Drupal

Organized by  
Open Source Software Resource Centre,  
C-DAC, Mumbai

November 29-30, 2007  
(Timings: 10.00 hrs. to 17.00 hrs)

At

Centre for Development  
of Advanced Computing  
(Formerly NCST)  
Gulmohar Cross Rd. No.9  
Juhu, Mumbai 4 00 049

## Introduction:

Open Source Software Solutions are being widely adopted by libraries all over the world. It represents the State of the Art in Information Retrieval and Management Systems. As distributors of knowledge, Librarians should be at the forefront of the Open Source Revolution.

Through Open Source Software, Librarians can collaborate more with other Information communities since it is "Open" – built on open Standards, capable of being customized as per the needs of individual libraries and it is managed by the people using the software which makes it even more possible for the librarians to solve their problems easily.

In India too, open Source tools are being considered by many libraries. This workshop intends to having a more collaborative effort from the libraries in Mumbai which is possible through Open Source Tools.

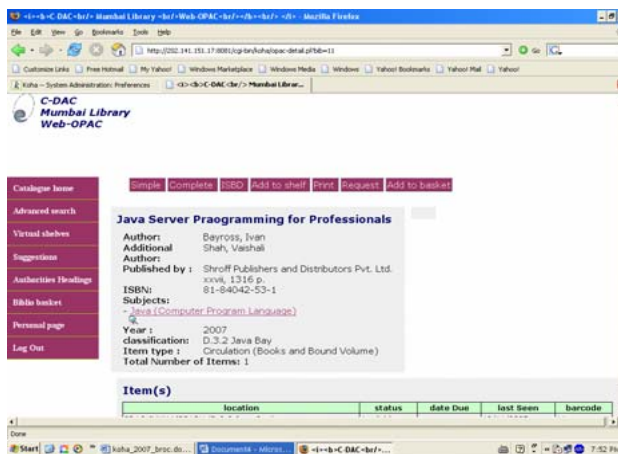

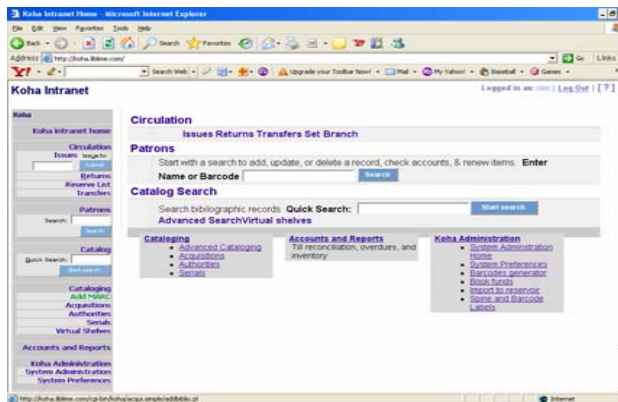

## Open Source Software Tools:

This workshop will focus on two full featured Open source Tools namely, Integrated Library Software -- Koha and Content Management System – Drupal.

## Koha:

Koha is a popular open source library management software which is being used world-wide. It is a comprehensive tool for managing various library functions like cataloguing, circulation, serials, web-based OPAC etc. at absolutely no cost in terms of software, no license fee and easy to use.
